

PVC Clamp Mount - 1.315"

ROB-12591

© images are CC BY-NC-SA 3.0

Description: This PVC clamp mount has a 1.315" bore, providing an easy way to incorporate standard 1" PVC pipe into your next project. A set screw secures the pipe while 2 6-32 tapped holes provide attachment points to additional parts.

Actobotics is a robotics building system based around extruded aluminum channels, gears, precision shafts, and ball bearings. Thanks to the two standardized hole patterns, nearly all Actobotics components can be intuitively connected together. The wide range of components makes building complex electromechanical prototypes or finished projects a reality.

Note: These mounts work with schedule 40 PVC, which has an outer diameter of 1.315", and an inner diameter of 1".
