

Helping Third Hand Magnifier W/Magnifying Glass Tool - MZ101

PRODUCT ID: 291

Description

- The classic 'third hand tool,' as seen on every desk! We have one next to our Panavise jr, they complement each other well. This tool is good for holding small PCBs and wires for tinning or soldering to parts.
 - Every part can rotate around in any way with thumbscrews and wingnuts.
 - Two sturdy alligator clips for holding PCBs, wires, parts
 - 2.5" diameter 4x magnifying glass good for checking out your soldering technique
 - Weighted base keeps everything steady

Even though there are fancier ones with soldering-iron holders, we found those would constantly tip over when a soldering iron was in place so we suggest getting one of these and a separate soldering iron holder/stand.
